

SUMMARY

- Over 14 years of experience in software development and testing.
- 4 years of experience in pre-sales and post-sales technical support.
- Strong communication skills with proven technical leadership capabilities.

TECHNICAL SKILLS

- Proficient in C/C++, Python, JavaScript, HTML/CSS
- Familiar with Perl, Linux Shell, SQL, Lua
- Knowledgeable in PostgreSQL
- Experienced in functional, regression, performance, and stability testing.
- Skilled in automation testing and tools development.

PROFESSIONAL EXPERIENCE

Technical Support Engineer, Customer Care, DTOne

2022/01-2024/10

Responsibilities:

- Provided troubleshooting support for international mobile top-up transactions.
- Resolved customer-reported issues related to API integrations.
- Developed and updated code for partner integration modules.
- Analyzed API transaction logs to identify and resolve customer issues.
- Created customized queries to meet customer requests for product and price list information.

Lead Technical Support Engineer, PTS, Here Technology

2019/12-2020/11

Responsibilities:

- Delivered pre-sales technical guidance and product demonstrations to customers.
- Provided technical support for contracted map products.
- Offered solutions for customer requirements related to Map API, SDK, and offline data.
- Developed tools to assist customers with map data processing.
- Created customized map rendering websites for product demonstrations.
- Assisted customer developers in debugging code and identifying root causes of issues.

Senior Architect, Global Software Verification (BJ), Sony Mobile

2011/04-2019/10

Responsibilities

- Created test cases for system testing, including performance, power consumption, and stability tests.
- Streamlined test approaches and scope to reduce costs.
- Designed, enhanced, and utilized automation testing tools.
- Developed and implemented a regression testing tool to improve efficiency.
- Established a test process within test case management for effective cost management.
- Led verification teams in Lund (Sweden) and Tokyo (Japan) for interface testing.
- Enhanced the knowledge and skills of test teams through training.

Projects

- Oversaw tracking of issue KPI statistics to monitor ROI and validity rates.
- Led the deployment of the AVE/DUST automation solution at the Beijing site from Lund, Sweden.
- Spearheaded improvements in the Stability Test Automation Solution, increasing issue coverage from 50% to 96%, reducing handsets from 49 to 20, and cutting runtime by 30%.
- Consolidated the product system test suite, eliminating two-thirds of test case overlap.
- Developed a product-focused test that achieved a 50% reduction in resource and cost allocation.
- Created a Regression Test Automated Analysis solution, saving 70% of manual testing efforts.
- Established an automation lab, resulting in savings of €12,060, 1,206 man-hours, and 50% of prototypes.

PROFESSIONAL EXPERIENCE

Software Engineer

Nokia

2009/02-2011/04

I focused on developing and enhancing tools for the Symbian ecosystem, facilitating tasks such as building, integrating, customizing, testing, and releasing Symbian OS/applications. These tools are integral to the Symbian SDK. Additionally, I played a key role in designing and constructing a cloud environment to automate BTR (build, integrate, test, and release) jobs.

Senior Test Engineer

CIeNET (Onsite working at Mobile Device, Motorola)

2007/01-2009/02

I led the testing team in conducting various tests, including functional, regression, system, risk-based, and exploratory testing. I served as a coordinator between testers and developers, facilitating bug identification, verification, and resolution. Additionally, I created the test plan, designed test cases, and delivered comprehensive test reports.

Software Developer

Beijing Galaxy Tech

2002/09-2004/08

As a junior developer, I wrote code for enterprise local communication software, focusing on audio and video functionalities.

EDUCATION AND Certificate

2004/09—2006/10 Dalhousie University, Canada

Electronic Engineering, Internetworking, Master of Engineer

1998/09—2002/07 Beijing Univ. of Post and Telecom

Computer Science and Technology, Bachelor

English Certificate (CET6)

Applying Lean and Agile Software Development: 2011

ISTQB – Foundation Level: 2011

Think on Your Feet: 2011
